

B.Sc (Blended) course in association with University of Melbourne

The GITAM is initiating an innovative Bachelors course in School of Science known as BSc (Blended) in collaboration with University of Melbourne (UOM), Australia to strengthen science education at the undergraduate level.

The GITAM is among the top universities in the country and has been in the forefront for initiating innovative programs. The UOM is ranked 1 in Australia and it has been among the top 50 in the world.

The BSc (Blended) program is a joint initiative of GITAM-UOM offering a transparent and internationally recognized bachelor degree in science underlining clearly the teaching objectives and learning outcome. In the first two years of the degree program all four basic sciences (biology, chemistry, mathematics and physics) will be taught providing basic knowledge with specialization in one of them in the third year. The UOM and IISER (Tirupati) will provide support in terms of special lectures, workshops, and quality assurance.

Eligibility:

Higher Secondary School Certificate (10+2) or its equivalent Examination in Science stream Mathematics as one of the subjects with 60% marks.

Highlights of the programme:

- Course will be run in collaboration with UOM
- Special lectures by expert faculty from IISER and other institutes
- UOM will provide online teaching of some topics from the syllabus
- Course will be accredited by the UOM
- Third year course can be pursued at University of Melbourne as an option or can be continued at GITAM Hyderabad.
- Degree will be considered at par with that of UOM and the students will be eligible to pursue higher studies (MS) at UOM and other universities in Australia

Signing of Letter of Intent by Prof. N. Siva Prasad, Pro Vice Chancellor, GITAM Hyderabad and Prof. Ashok Kumar Muthupandian, Asst. Deputy Vice-Chancellor International, University of Melbourne.
